Katherine Kuan

Developer Advocate at Google

2 people have recommended Katherine

"I've never worked directly with Katherine, but I've learned alot with her during the Udacity course of Android fundamentals. Her skills as software developer are really good as I could see in one of the sample apps (Just for us) released on the valentineso. She is also a great communicator that manages to pass whatever she wants to teach in a really excited way!"

— **Dario Mungoi**, *Lead, GDG Maputo*, worked indirectly for Katherine at Google

"Kat is amazing. She is what we call an "athlete", one of those people who no matter what you throw at her, she can figure it out. This is not limited to programming. I watch Kat excel in policy meetings with senior officials, train hospital Head of IT and explain health care business opportunities to C-level execs. All walked away impressed. I look forward to hearing about the amazing things Katherine will accomplish in her lifetime."

— **Ted Chan**, worked directly with Katherine at Moca Mobile (MIT Media Laboratory)
