SIDNEY ANDREWS

Sidney is an Azure MVP, Microsoft Certified Trainer (MCT) and Cloud Applications Consultant representing SeeSharpRun.NET. He has a background in client and device development with an emphasis on touch-enabled applications. Sidney has also been a featured ASP.NET and SharePoint web developer in the Central VA market. Most recently, Sidney has focused on consulting for clients creating greenfield web solutions on the Azure platform.

Below is a list of courses that Sidney has authored for Microsoft:

- **Microsoft Official Courseware:**
  - 10978A: Introduction to Azure^{TM} for Developers
  - 20532B: Developing Microsoft Azure Solutions
- **edX.org:**
  - Architecting Microsoft Azure Solutions
  - https://www.edx.org/course/introduction-xaml-application-microsoft-dev206-1x
  - Designing Advanced Applications using XAML

Sidney regularly travels to user groups, conferences and code camps to evangelize the Azure platform and the XAML language. In his free-time, Sidney regularly surfs Kickstarter and GitHub for interesting JavaScript projects. This web site was built entirely using the new Ghost blogging platform build on Node and hosted in Azure.

☁ Cloud

Sidney is a Subject-Matter Expert and leading consultant in the Microsoft Azure^{TM} market. He has delivered multiple enterprise-scale projects for customers ranging from media applications, to Internet-of-Things implementations, mobile application back-ends and scalable web applications.

📕 Training

As a Microsoft Certified Trainer, Sidney has delivered courses to a wide range of students on topics such as ASP.NET , Azure, C#, XAML, HTML5 and ASP.NET MVC. As a leading instructor, he has traveled to offer guidance on training and certifications to conference attendees at major events such as TechEd North America, Build and SharePoint conference.

🌐 Web

Sidney began his career as an ASP.NET developer migrating Access databases to ASP.NET 2.0, Web Forms and SQL. Since then he has worked with ASP.NET frameworks such as MVC and Web Pages. He has also developed successful SharePoint solutions using C# and JavaScript. Lately Sidney has worked with frameworks such as Angular, Node.js, TypeScript, Sammy and Express.

😮 Apps

Sidney operated a XAML consultancy for many years that specialized in providing Silverlight and WPF solutions for unique user experiences. He has developed Line of Buisness solutions, Touch-screen kiosks and distributed Silverlight web applications. Sidney's expertise is delivering multiple mobile (iOS, Android, Windows Phone, Windows 8) applications for startup organizations quickly and at reasonable cost.

RESUME

2015

Director of Developer Training

📅 March 2015 - September 2015
